

Apollo is constantly introducing innovative products to the diving community.

The ex series drysuits are the ultimate in comfort and ease of use. From the 2nd skin latex seals to the tip of our neoprene boots with tennis shoe sole; every detail has been considered.

Don't take our word for it! We let the world's premier independent testing facility come up with the answers.

Rodale's Scuba Diving Magazine
"Tester's Choice" 2001

• Features of 4.0 ex drysuit

4.0 microcell neoprene • trim-to-fit latex seals • heavy duty knee pads • neoprene boot with tennis shoe sole • foot valve installed on the ankle of each boot • foot and shoulder valves are designed for quick cleaning and easy maintenance • 360° rotating inlet valve with slide action • ex shoulder exhaust valve provides choice of manual or automatic setting • high quality YKK zipper • back entry • internal suspender system

Mens: Black Sizes: S, M, ML, L, XL, & XXL
Ladies: Black/gray Sizes: XS, S, & M

Complete size chart provided on back

• Wrap yourself in comfort

4.0 microcell neoprene has 20% smaller bubbles than conventional neoprene. Rather than crushing material to decrease density; microcell is produced by blowing a gas, generally nitrogen into the liquefied rubber to make a foam. Utilizing this thinner more flexible material provides you with a suit that swims like a tropical wetsuit; yet yields a warmth factor similar to that of a 6.5mm suit. Microcell is also less bouyant which means you can lighten your load by taking a few pounds off your belt.

This material choice also makes the suit more versatile. Perfect by itself in temperate waters, or wear a simple polartech jumpsuit underneath to dive the cooler waters in the winter. Planning to dive in some really cold water? Our test divers layered it with expedition weight long underwear for a three hour exploration in the 39F/5C waters of Japan's Ryusen-do caves.

• Extras

Latex seals for the neck and wrist. These are trim-to-fit to ensure that seals will fit even the thinnest wrist snugly.

Knee pads are sewn onto the neoprene rather than into. This helps maintain the overall warmth of suit while providing extra protection for the knee and shin area.

Full neoprene boots wrap your feet in warmth. The tennis shoe sole protect your feet and the integrity of your suit from sand, rocks, and debris.

Interior suspenders help keep suit in place during use and also make it easier to get into.

• Hardware

Our 360° inlet valve allows hose placement in the position you find most comfortable. Slide action is used rather than press type to prevent accidental inflation.

The EX shoulder exhaust valve provides a choice of manual or automatic release of air. This valve is designed for quick cleaning and maintenance by owner as needed.

• Foot valves

Many divers wear ankle weights to compensate for air trapping. When air becomes trapped in the boots the diver can become accidentally inverted. It is difficult to right yourself once this has occurred.

The foot valves keep air from getting trapped in the boot; automatically releasing air as needed.

Foot valves end the need for ankle weights which can make kicking more difficult and uncomfortable.

• **Size it right!**

A little extra length in the arms and legs will give a full range of movement and help increase the life of your seams.

Actual boot size is provided in centimeters. You can measure your foot to determine the best size; allow space for any socks or additional footwear if applicable.

The approximate equivalent in standard US Men's shoe size is noted below. Women should increase range below by approximately one shoe size.
 25 (6-7) • 26 (7-8) • 27 (8-9) • 28 (9-10) • 30 (11-12) • 31 (12-13) • 32 (13-14) • 33 (14-15)

Men's fit & boot	Height	Weight	Inseam	Chest
S 26	5'5" - 5'8"	140 - 160	28 - 30	35 - 37
M 27	5'7" - 5'9"	150 - 170	29 - 31	36 - 38
ML 28	5'8" - 5'10"	180 - 200	30 - 32	36 - 38
L 28	5'10" - 6'1"	190 - 210	31 - 33	38 - 42
L 30	5'10" - 6'1"	190 - 210	31 - 33	38 - 42
XL 30	6'1" - 6'3"	210 - 230	32 - 34	39 - 44
XL 32	6'1" - 6'3"	210 - 230	32 - 34	39 - 44
XXL 31	6'3" - 6'5"	230 - 250	33 - 35	40 - 46
XXL 33	6'3" - 6'5"	230 - 250	33 - 35	40 - 46

Ladies fit & boot	Height	Weight	Inseam	Chest
XS 24	5'3" - 5'5"	100 - 120	26 - 28	32 - 34
S 25	5'4" - 5'6"	110 - 130	28 - 30	33 - 35
M 26	5'5" - 5'7"	120 - 140	29 - 31	34 - 36

Manta rays glide gracefully through the water with ease and confidence. So can we.
