

bio-fin pro c-series

the original and award winning split-fin just got even better.

Since first introduced in 1998, test after test has proven that Apollo's bio-fin pro can't be beat. Every major manufacturer now offers some version of Apollo's bio-fin. But... not all split fins are equal and Apollo continues to win military, commercial, and recreational diving fans around the world.

Whether diving is for business or pleasure; the time it takes to replace a broken strap can be costly. Don't lose another dollar or miss a once in a lifetime moment to strap problems. Apollo's new bio fin c-series are the only split-fins available with a commercial grade strap built-in.

for immediate release

NEW
**apollo bio-fin
pro & pro XT
c-series**

The enormous advantages the bio fin offers over other fins has become very obvious

- **High quality stainless steel coil spring**
will not rust or break
automatically adjusts to changing conditions
no more stopping to tighten down a loose strap
built-in to avoid problems with sand and debris
reduces time required to slip on and off
- **Rugged rubber grip**
sturdy rubber grip adds comfort and stability
finger loop makes slipping on and off a breeze
even with heavy gloves
- The only 100% rubber split fin
- The only split fin designed with a 20 degree angle to work with your bodies natural resting position
- The only split fin sold with a commercial grade strap installed
- **bio-fin PRO**
Ultimate in comfort - Highest speeds
Least amount of strain on the body - No silt up
- **bio-fin PRO xt**
Higher durometer rubber for increased torque and maneuverability - with any kick style

1999 - 2003
