

We spent two years fine tuning the design and material consistency of the original bio-fin PRO. The softer rubber chosen for the PRO model provides the highest degree of comfort and speed.

All divers are not created equal. It all comes down to your personal preference and diving needs. For those who prefer the feeling of extra torque Apollo presents the NEW bio-fin pro **XT** (Fall 2002).

### • **Benefits of bio-fin pro XT**

---

- Higher durometer rubber provides the feel and weight of a more traditional fin
- Works as well or better than paddle fins with any choice of kicking style
- Instant turning and pivoting on a dime
- Increased control and added leverage for technical divers
- Reduced air consumption
- Increased bottom time

### • **Options**

---

Color: metallic black

Size: M 8-9, L 9-10, LL 11-13+
